

# Colorline Masks by hyphen sports

Comfortable, adjustable, washable, re-usable, sustainable.

These re-usable masks reduce the danger of infecting others by halting the spread of viruses and bacteria. In addition, the masks help prevent you from touching sensitive areas of your face with contaminated hands.

hyphen sports masks are not a certified medical product, but are designed for general use, including DIY and any other work needing breathing protection.

- hyphen sports masks are made from a double layer of materials and are washable at 60°C. The outer layer is made from an extremely tightly woven microfibre fabric (Polyamide and Elasthane) and the inner layer is made from a knitted cotton fabric which successfully blocks droplets (from speaking, sneezing, coughing) and has an anti-bacterial finish (as tested by the University of Padua, Italy).
- The materials are certified to OEKOTEX® Class I, Allergy UK and bluesign, are free from any allergenic or toxic products so are very kind to your skin. The fabric also has a high UV protection rate.
- Adjustable fit through two, separate fabric ties at your nape and at the back of your head
- MADE IN EUROPE. Designed in Germany and made in Croatia from Italian fabrics.
